

Green Suites Gives You Choices

Green Suites pays you cash incentives when you remove old inefficient equipment and replace it with newer efficient models.

Eligible equipment for this program includes such items as lighting, motors, space heating and cooling equipment, water heaters and some energy star gas kitchen equipment.

You can choose the prescriptive track; made up of known and tested technologies and requiring simple installations. Or you can choose the custom track where you can install newer, innovative technologies or apply an existing technology in a custom installation.

There is no maximum amount for Green Suites incentive. EnWin has already handed out over \$50,000 in a similar program.

Prescriptive Track

- This track has predefined technologies
- Simple replacements.
- You may apply even if you have already started the work
- Pays about \$250 /kw saved
- Minimum \$250 incentive

Custom Track

- Anything not on the prescriptive track – custom designs or new technologies.
- You or your contractor demonstrates the kilowatt savings.
- You must get approval before you start the work
- Pays about \$250/kW (or 50% of incremental cost, if lower)
- Minimum 5kW savings

Am I Eligible for Green Suites?

- *If you are a hotel or motel owner or operator and you purchase your electricity from EnWin Utilities...*
- *Even if you purchase electricity through an aggregator (e.g. Direct Energy)...*
- *If your retrofit project reduces the amount of electricity your facility uses...*
- *If your project falls under the prescriptive track, you may still apply even if the work has already begun...*

The Prescriptive List

LIGHTING

Fluorescent lighting systems (T8, T5, CFL)
High intensity discharge lighting systems
LED "EXIT" signs
Occupancy sensors

MOTORS

Three-phase premium-efficiency motors 1-200 HP

ALTERNATIVE ENERGY MEASURES FOR FOOD SERVICES

Gas griddles and fryers

COOLING EQUIPMENT

Unitary A/C units up to 25 tons that are energy star-qualified or CEE compliant

ALTERNATIVE ENERGY MEASURES FOR SERVICE HOT WATER

Solar hot water heating
Drain water heat recovery
Non-electric tank and instantaneous water heating

ALTERNATIVE ENERGY MEASURES FOR SPACE COOLING

Ground-source heat pumps
Desiccant dehumidification
Absorption and engine-driven chillers
