# peak saver<sup>®</sup>

When you enrol in **peaksaver**, your central air conditioning system will be automatically adjusted when demand for electricity is at its highest. In just a few simple steps, you can join over 170,000 other Ontarian households in helping to reduce the strain on our electricity system and the environment. And since the temperature in your home would only be adjusted by 1–2°C in the summer, and just on weekdays during the day, it won't affect your comfort. Plus **peaksaver** is free to join and you can opt out at any time, so you always remain in control.

It only takes a few minutes to sign up and as thanks, you'll **receive \$25 off your utility bill and a FREE programmable thermostat** just for participating!
