

Annual Fire Hydrant Flushing Program

May to September, 2020

8 a.m. - 3:30 p.m. (Monday - Friday)

Mild discolouration and sedimentation may occur.

Refer to back for important steps.

Discolouration lasting longer than 24 hours should be reported to ENWIN at 519-255-2727.

Additional questions?
Email info@enwin.com

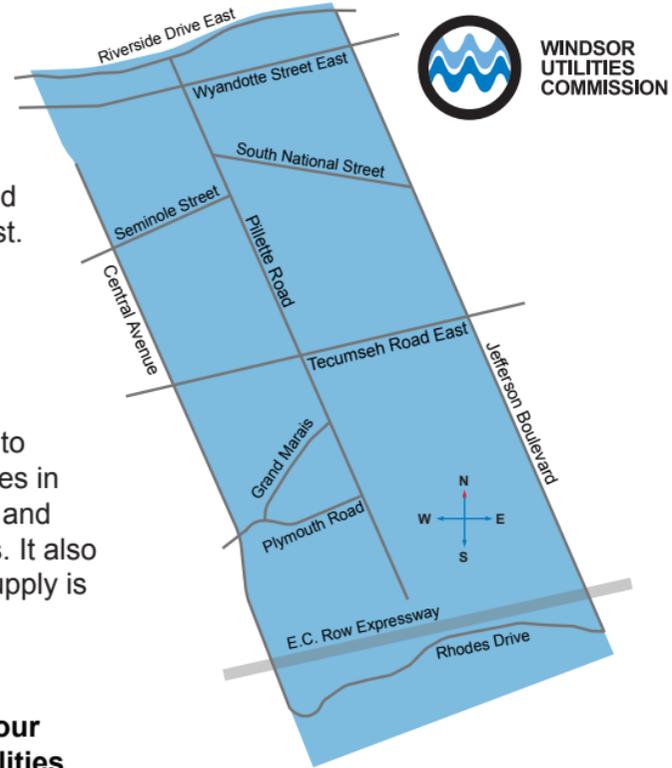

Are we in your area?

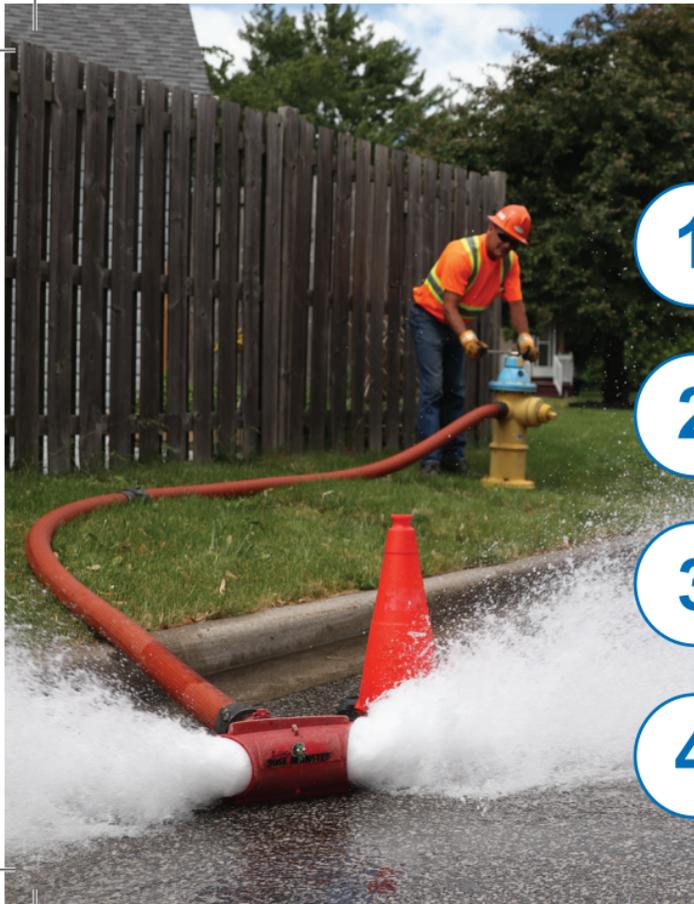

Riverside Drive to the north, Rhodes Drive to the south, Central Avenue to the west and Jefferson Boulevard to the east.

Why is it necessary?

Hydrant flushing is necessary to remove sediment from the pipes in order to maintain water clarity and quality in the distribution pipes. It also ensures an adequate water supply is available in case of a fire.

For a daily schedule follow our Twitter account @ENWINutilities

Minimize Potential Disruptions

1

Fill some containers with water you may require during the duration of the work. Once flushing has completed, flow cold water through your interior faucets until clear.

2

Laundry may be damaged due to discolouration of the water. Please avoid doing laundry until the flushing has completed work in your neighbourhood for that day.

3

Try not to run any hot water taps, as some discoloured water and sediment may be drawn into your hot water heater.

4

While drinking small quantities of discoloured water is not likely to cause a health risk, it is recommended that residents wait until the water runs clear before consuming water. Boiling water is not required.
